

TreeCare[®]

PRODUCTS

SUPPORT FOR TREES AND LARGE PLANTS

Strong and Multifunctional! Made of durable, high-density polyethylene, ProLock[®] is stronger than most competitive chain lock products. ProLock[®] simply pulls through itself and twists into a locking position. It's also treated with UV inhibitors to prevent cracking or breaking down due to sun exposure. The carton offers efficient dispensing of just the length needed, saving time and materials.

Utilize for trees, plants & more.

- ▶ Holds support stakes to smaller trees.
- ▶ Holds climbing plants to trellises, arbors & lattice.
- ▶ Holds tomato plants to stakes.
- ▶ Holds grapevines to support wires.
- ▶ Also great for bundling cords & hoses!

ProLock[®] ½"

Designed for staking trees of 2" caliper or less. Also can be used for holding plants to trellises, lattice or other structures. Available in 250' cartons, 12 cartons per master case.

ProLock[®] 1"

Designed for use with trees larger than 2" caliper and in applications that require stronger support. Available in 100' per cartons, 10 cartons per master case.

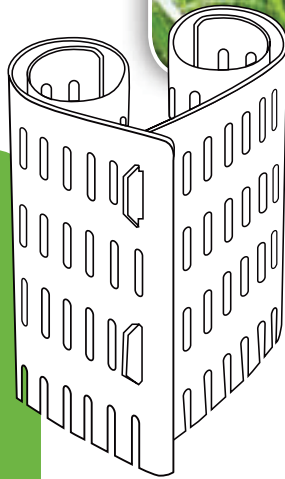

PROTECTION FOR TREES OF ANY SIZE

String Trimmer? No Problem!

Made of durable polyethylene, ArborGard® shields tree trunks from damaging string trimmers. ArborGard® also protects against bark damage from gardening equipment, tools, rodents and other small pests. Holes are sized to prevent insect infestation and bark rot. ArborGard® is manufactured in round tube form and unlike flat tree guards, will not lose its coil shape in hot sun.

ArborGard+® coils stand 9" tall and protect trees up to 4" in diameter. Combine two or more coils for larger trees. Available in 100-count bulk cases and NEW 6, 12, and 30-count cases.

Unique expansion tabs allow two or more units to be combined to protect trees larger than 4" in diameter.
